MINOR CITY TOPICS.

The many locust trees around the city are in full bloom and are filling the air with a delicious odor.

A large number of lithographic posters advertising the rough riders' reunion at Las Vegas were distributed around the city yesterday.

Grand Master John Spears of the Odd Fellows will visit Santa Fe on June 22. He will be tendered a reception and a banquet by the local Odd Fellows.

Toronto Academy will on Wednesday evening, June 21, at 7:30 o'clock celebrate its forty-sixth annual commencement. The New Mexican acknowledges the receipt of an invitation to the affair.

The Elks' hall above Kaune's store has been elegantly furnished and renovated and on Wednesday evening the noble herd of Elks will hold their first meeting in the hall. Paradise Lodge of Odd Fellows and the Knights of Pythias also intend to move into the hall.

The Denver & Rio Grande railway, as a favor to the rough riders and the people of Las Vegas, has abandoned its annual excursion to San Juan on St. John's day, June 24. This is quite a sacrifice as several hundred people annually make the trip on that day to San Juan and no other day can well be substituted for the excursion. The Denver & Rio Grande also granted a half rate from all points south of Salda and east of Durango to the rough riders' reunion.

Superintendent Vietz of the Indian government school, this forenoon received five handsomely engraved diplomas to be awarded five graduates of the normal department at the commencement exercises on the evening of June 25. The baccalaureate sermon to the graduating class will be preached by Rev. A. H. Sullivan of Cerrillos, Sunday evening at eight o'clock.

The Santa Fe Mercantile Company this afternoon received a fine large case with twelve shelves, for the display of ribbons, etc.

THE NEW CAPITOL ALMOST COMPLETED

The Exterior Work Will Be Finished Next Week and the Interior Will Be Ready By October 15--A Magnificent Building That Is a Credit to the Territory.

The classic beauty of the new capitol is apparent now to every beholder, but to get a true idea of its magnitude and the thoroughness with which the building is being constructed, it must be closely inspected. For that purpose, Assistant United States Attorney W. H. Pope, of Santa Fe, who is secretary of the capitol rebuilding board, and a number of other citizens and visitors spent two hours at the capitol, and were shown by Architect I. H. Rapp through the building from the basement to the top of the magnificent dome.

The exterior of the building is almost completed, and the finishing touches will be put to it within the next two weeks. The entrance from the west is grand. Six Ionic and Doric fluted columns, about 27 feet high, of Bedford, Ind. limestone, bear a triangular tympanum, upon which is being carved the crest of arms of the territory. Thirty-six stone steps, 36 feet 9 inches wide and 14-inch tread, lead up to the main entrance of the building. The whole entrance is as magnificent an architectural monument as is to be found in the southwest. The brickwork and stone coping of the exterior of the building also show up very well. The dome surmounting the building is a work of beauty, and gives to the whole city a distinctive appearance.

The frontage of the building is 176 feet 10 inches. The depth is 76 feet 10 inches. The building is three stories in height, and from the basement to the top of the lantern above the cupola is about 150 feet. The ground floor or first story of the capitol is of Lamy sandstone, while the other two stories are built of yellow brick, the color of sandstone with handsome Grecian coping and rook in harmony with the whole.

The basement is 12 feet in the clear, and contains the boiler room, cold air chambers, storage rooms, coal bins and a 9-foot ventilating conduit, through which air will be forced throughout the capitol building. The boilers have all been placed, the pipes are all in position, and the plumbing completed.

The first story is over 12 feet in the clear, and the artistic work of the plasterers is beginning to show up finely. In the north wing are found the offices of the treasurer and the auditor, each with very large vaults. The treasurer will have two rooms 17x24 feet, and the auditor four rooms, one of which will be used as a reception room, and all large enough, as one of the party said, "to house the auditor's whole family."

The fireproof record vault is 13x18 feet. In the south wing are the offices of the governor and the secretary of the territory. The governor's office rooms will be the prettiest apartments in the capitol, and even now, before they are completed, invite admiration. The superintendent of public instruction will have three rooms in the rear. There is a corridor 10 feet wide in the wings and 15 feet wide in the main. Two wide iron stairways, finished off with ash and with brass banister, lead to the second and third floors. The second floor will also be reached by the magnificent flight of stairs from the outside.

The entrance has two sets of doors, one set from the classic portico with stone balustrades, and a second from the vestibule into the main corridors. At the right of the entrance are the offices of the attorney general, including two rooms. On the left is the reading room of the senate, with the post office, which has a large arched window with Florentine chipped glass toward the corridor. The rear of the second floor will be fitted as the territorial library, and is well lit up with large windows. Adjoining it is the supreme court room.

The senate chamber is in the north wing, and is 27 feet high. There is a commodious gallery in the chamber, supported by iron pillars, that will be covered so as to resemble marble pillars. A lobby, committee rooms, toilet apartment, lavatory, etc., are also on the second floor. The ceiling of the senate chamber is artistically studded with fifty electric lights. In the whole building there will be over 1,100 electric lights, in addition to 250 lights in the dome. The electricity will be furnished by the penitentiary.

Taken all in all, the territory can well be proud of the new capitol, the work of the capitol rebuilding board, and the fact that the capitol was built without the breath of scandal or a suspicion of wrongdoing being connected with the rearing of the magnificent building.

Court Notes.

In the case of A. Mahoub against Kilihi Seba, both Arabians, Judge McFie yesterday afternoon denied the petition for appointment of auditors and ordered the defendant to answer by Monday forenoon.

In the divorce case of David J. Norman of Santa Fe against his wife, residing in Las Vegas, an application for alimony pending suit was made. Judge McFie allowed the application and ordered the plaintiff to deposit \$150 in court to employ counsel and to defray the expenses of Mrs. Norman in defending the suit.

Ice cream soda at Fischer's every day. All kinds of soft drinks served in first-class style. Everything neat and clean.

On the third floor will be the house of representatives, with a gallery seating 150 people. Committee rooms, toilet rooms and offices occupy the remainder of that floor. Four trusses support the roof of the house of representatives and the dome. The diameter of the dome is 40 feet. The roof on either wing is flat, and as thoroughly waterproof as iron, pitch, felt and gravel can make it. The roofs would be a splendid site for roof gardens.

The view from the dome is magnificent. The eye is limited only by the mountain walls on all four sides of the valley. To the west the smoke can be seen curling up from the mills at Bland. To the south the mountains in back of Lamy rear azure crests, while to east and north the near-by mountain ranges, with Mount Baldy on the second range, form a strong background to the City of Santa Fe, with its beauteous orchards. The flooring inside the building will be tile work. The plastering is done upon iron lath work, and the building is practically fireproof. Two tanks, each holding 2,800 gallons, will be placed above the principal vaults, of which there are eight in the building. Marble switchboards are placed on the different floors for the electric lights. Water pipes will be run on the roof, so that large hose can be attached to them in case of fire, and water pipes will be run to all parts of the building. The dome is almost entirely of steel.

Many of the rooms will have pretty fireplaces, but the heating will be by steam, and can be shut off from any part of the building at any time. The plastering of the interior of the building is partly complete, and is very artistic. The floors are laid of strong Manila fiber is mixed with the plaster castings for the ornaments and pillars in the building are made on the premises.

On the ribs on the exterior of the dome, electric lights will be strung, and they will be lit upon festival occasions. Decorative features can be added to the capitol from year to year, just as each legislature sees fit to order. The capitol building will, however, be ready to be turned over to the territory by October 15 if the furniture can be placed in that time. Architect Rapp has reared to himself a monument in the capitol of which he can well be proud. It is complete in every particular, and arranged so perfectly that it must be classed as one of the finest capitol west of the Mississippi. A noteworthy feature of the building of the capitol is the comparatively small amount of money expended upon it. It will be completed and furnished ready for occupation after the expenditure of only \$135,000, or perhaps less. Of course, sums of money will probably be spent upon it hereafter to further beautify it with works of art and to lay out the handsome grounds that surround it. Convict labor is one of the causes for the cheapness of the building, for fifty convicts have been employed upon it daily at an expense to the rebuilding commission of only \$10. The convicts have developed into excellent help, and under the instruction of good mechanics did their work well. The work being done around the capitol at present is mostly contract work. Much of the material for the capitol was bought cheaply, and bricks were furnished in large quantities by the penitentiary. Plate glass for the building that two years ago, when bids were asked, cost only \$1,700, now costs \$2,700, and in many similar instances money was saved.

Architect Rapp says that through the personal effort of Governor Otero, who has been taking great interest and extended considerable aid to the rebuilding of the capitol, \$2,500 was saved in freight rates alone. A spur of the Santa Fe railroad was built into the capitol grounds, and through the governor's personal influence the rates for material that had to be brought from a distance were reduced more than 50 per cent.

Taken all in all, the territory can well be proud of the new capitol, the work of the capitol rebuilding board, and the fact that the capitol was built without the breath of scandal or a suspicion of wrongdoing being connected with the rearing of the magnificent building.

COURT NOTES.

In the case of A. Mahoub against Kilihi Seba, both Arabians, Judge McFie yesterday afternoon denied the petition for appointment of auditors and ordered the defendant to answer by Monday forenoon.

In the divorce case of David J. Norman of Santa Fe against his wife, residing in Las Vegas, an application for alimony pending suit was made. Judge McFie allowed the application and ordered the plaintiff to deposit \$150 in court to employ counsel and to defray the expenses of Mrs. Norman in defending the suit.

Ice cream soda at Fischer's every day. All kinds of soft drinks served in first-class style. Everything neat and clean.

RESERVOIR SITES.

Their Storage Capacity At Last Being Ascertained by the Government.

F. H. Newell, chief of the hydrographic bureau and geological survey, who is in Santa Fe, says that the measurements of the flow of the Rio Grande began about eleven years ago, and are still in progress, to determine the amount of water that can be stored in reservoirs should the government, the territory or private enterprise undertake the work.

The engineers of the department consider the storage proposition as feasible, and say that it is the best method, if not the only one, for utilizing the public domain. Mr. Newell thinks that it is useless to hope that this will come through private enterprise. Reservoirs, mostly small, may be built here or there by corporations having large landed interests or concerned with the increase of supplies for a city or suburban population, but they can not be constructed for a development of great areas of improved or partially improved farming land. These must either lie idle or united action must be taken along definite lines established by careful investigation and expert report.

If the locations are wisely selected and the structures are economically built, there is no doubt that storage works will return directly and indirectly their cost, and ultimately a reasonable percentage on the investment, especially if we take the increased values of all taxable property.

Mr. Newell has directed Phil E. Harroun, his hydrographic engineer in this territory, to go to various reservoir sites in the territory, make careful surveys, estimate the storage capacity and the probable cost of construction. That official has a force of five men, and the work will occupy several months. This data and the flow of the river, Mr. Newell says, are absolutely necessary to have if the government or private capital is to be asked to undertake the enterprise, for it would not be considered without accurate information being submitted.

This preliminary work has been advanced in the northwest, because, as Mr. Newell says, "the people up there have howled for it, while in New Mexico there has been less interest shown, and the people have been willing to wait, take what comes, and not worry about that which comes not." The appropriation at his disposal has been limited, and it has been necessary to scatter, but the work in New Mexico is to be done thoroughly now, for the time is approaching when something can be done for the cause of water conservation.

Mr. Newell has visited the reservoir on the Santa Fe river, went up the Rio Grande yesterday, will to-day leave with Mr. Harroun to see the reservoir on the Indian reservation, then go as far as El Paso, and from there visit the headwaters of the Gila river.

PERSONAL MENTION.

H. B. Martin of Dallas, is stopping at the Claire.

M. F. Murphy of Las Vegas, is stopping at the Palace.

J. Koury, a Cerrillos merchant, is a guest at the Palace.

Hon. Juan Santistevan returned home to Taos this morning.

Martin Kimmell of Garden City, is a guest at the Palace.

C. M. Jones, a traveling man from Pueblo, is a guest at the Palace.

E. L. Hanklin, Las Vegas, a traveling man, is a guest at the Claire.

Wade S. Dent, a traveling man from New York, is a guest at the Claire.

J. W. Rogers, a New York commercial agent, is stopping at the Claire.

W. L. Cornish, traveling for a Pueblo house, is a guest at the Claire.

James Brandin and H. B. Holbert of Denver, are guests at the Exchange.

Benjamin S. Price, a traveling man from Denver, is a guest at the Palace.

Auditor L. M. Ortiz went to Los Luceros today but will return this evening.

J. H. Lanagan, a Kansas City traveling man, registered last evening at the Palace.

Thomas E. Waldo, son of Judge Waldo, of Las Vegas, registered last evening at the Palace.

L. M. Wildin of Philadelphia, interested in New Mexico mines, is a guest at the Claire.

Hon. Pedro Sanchez, member of the thirty-third legislative assembly from Taos, came in last night, and leaves for home in the morning.

Mayor J. W. Fleming of Silver City, coal mine inspector for the territory, is a guest at the Claire.

Dr. L. E. Fulton, who was a guest of General Charles E. Basley, returned to St. Louis last evening.

J. J. Lujan is in the city on business before the United States land office. He registers at the Bon Ton.

Mrs. T. J. Curran of Albuquerque, came home with Mrs. Amado Chavez, who has been at Jemez springs.

Rev. A. Gentile of Albuquerque, is a guest at the sanitarium, and called upon Archbishop Bourgade this morning.

Lieutenant Sherrard Coleman went to Rio Arriba county this morning to do some surveying work on the Polvadera grant.

Wm. Stein of White Rock, who has been visiting in the city for the past ten days, returned this morning. He was a guest at the Bon Ton.

Hon. Jefferson Reynolds and Col. Marcus Brunswick of Las Vegas came over from that city last night and are guests at the Palace.

Thomas C. Sewall of Elizabethtown, and John Z. Adams, of New York, registered last evening at the Claire. They are in this section looking for copper prospects and this morning went to Free Pedras for that purpose.

Edward and Julius Staab returned home from college in the east last evening, and will spend the summer in Santa Fe. Julius Staab graduated from the law school of Columbia College, New York, and Edward Staab will enter the senior class of the University of Pennsylvania in September, taking the medical course.

Albuquerque Items.

Chas. H. Lyle, colored, is under arrest on a charge of forging a check and passing it on I. Long to secure wine for the approaching wedding of the alleged forger. Lyle got the wine and the bride, daughter of Manuel Chavez, of Bernal.

James Grunfeld has sold his stock of dry goods to B. Stern & Co.

Josephine, daughter of J. B. Armijo, died in New York of consumption.

A Bear End Collision.

A head-end collision between west-bound freight train No. 33 and east-bound extra freight occurred on the Santa Fe at the south end of the Raton tunnel, Sunday morning at 12:25, badly disabling two engines and wrecking three freight cars.

"Duly Feed Man and Steed."

Feed your nerves, also, if you would have them strong. The blood is the feeder and sustainer of the whole nervous system. Men and women who are nervous are so because their nerves are starved. When they make their blood rich and pure with Hood's Sarsaparilla their nervousness disappears because the nerves are properly fed. Hood's Sarsaparilla never disappoints.

Hood's Pills cure constipation. Price 25c.

Go to J. A. Davis for your plumbing—good work at reasonable prices. Lower Frisco street.

Fischer & Co.'s candies are always fresh.

WANTED—To rent a four or five room house.—H. L. DUNNING, Santa Fe, N. M. Box 301.

Wool Shipments.

E. J. McLean Co. are shipping from Lamy and Santa Fe 800 bags of wool bought from the growers of this county. Nearly all the wool usually shipped from Santa Fe goes to Lamy this year on account of there being no water at the usual places of shearing near this city. The prices are said to be very satisfactory to the growers.

After Santa Fe Business.

T. B. S. Brasted and wife of Pueblo, who spent several days in Santa Fe returned home this morning. Mr. Brasted is general agent for the Rock Island & Pacific railroad. This is the first time that a representative of that great railroad has made an effort to get business in this section of the country. Mr. Brasted was much impressed with the business possibilities of Santa Fe.

U. S. Weather Bureau Notes.

Forecast for New Mexico: Generally fair tonight and Wednesday.

Yesterday the thermometer registered as follows: Maximum temperature, 84 degrees, at 3:30 p. m.; minimum, 56 degrees, at 5:15 a. m. The mean temperature for the 24 hours was 70 degrees; mean daily humidity, 21 per cent.

A Lunch Counter.

That keeps everything in both eastern and western markets at the Bon Ton Restaurant. Give them a call!

G. C. Berlieth, manufacturer of tin, copper and iron ware. Roofing and gutting a specialty. San Francisco street, John Hammer's old stand. Would like to see all his friends to call.

Only 25 Cents.

Is all they ask you for the best meal that you ever saw. If you don't believe it call at the Bon Ton Restaurant and be convinced.

Take a Glance at the Following Bargains:

Ladies waists from 25 cents upwards.

Calicoes, the very best grades, 20 yds for \$1.

Dress goods of all kinds from 15c yd. upward.

Our line of shoes complete, the very best in the city, all guaranteed, from \$1 upward.

Complete stock of carpets, oilcloth, etc., at the lowest prices.

We have decided to cut prices on everything and now is the time to take advantage of this.

Straw hats from 15c upward. Not last season's wear either.

The public is invited to come to the store and examine for themselves. It is no trouble to show goods.
